

# JYOTHI SWAROOP REDDY MULA

## DevOps Engineer

+91 9100463437 • [jyothiswaroopreddymula@gmail.com](mailto:jyothiswaroopreddymula@gmail.com) • Nellore, Andhra Pradesh, India

### Profile Summary

---

- DevOps Engineer with 4.8 years of experience in architecting and optimizing CI/CD pipelines using Jenkins and GitHub Actions. Skilled in working with cross-functional teams to streamline software delivery, resolve technical challenges, and improve operational efficiency.
- Proven track record in managing and optimizing end-to-end DevOps toolchains, with expertise across version control, build automation, and deployment ecosystems. Demonstrated success in driving performance, reliability, and operational scalability.
- Hands-on experience implementing Infrastructure as Code with Terraform in AWS, combined with strong domain knowledge in containerization and orchestration using Docker and Kubernetes.
- Skilled in leveraging GenAI technologies to streamline workflow development, enhance monitoring intelligence, and drive continuous optimization across CI/CD and cloud automation pipelines.

### Technical Skills

---

**CI/CD Tools:** Jenkins, GitHub Actions, Harness

**Containerization and Orchestration:** Docker, Kubernetes, OpenShift

**Cloud Platforms:** AWS

**Infrastructure as Code:** Terraform

**Version Control Systems:** Git, GitHub

**Scripting Languages:** Python, Bash, PowerShell, Groovy, YAML

**Security & Code Quality:** SonarQube, CodeQL, Megalinter, JFrog Xray

### Work Experience

---

**Deloitte Touche Tohmatsu India**

Hyderabad, India

**Consultant**

June 2026 – Present

**Cloud & CI/CD Automation:**

**Role:** DevOps Engineer

- Developed hands-on POCs around AWS, Terraform, GitHub Actions, Docker, and DevSecOps to strengthen cloud-native delivery capabilities.
- Built and optimized GitHub Actions CI/CD workflows, including reusable workflows, environment-based deployments, approvals, and secrets management.
- Created reusable Terraform configurations for standardized and repeatable AWS infrastructure provisioning.
- Explored AWS cloud services, containerization, and DevSecOps practices aligned with enterprise project requirements.

**Infosys Pvt Ltd**

Bengaluru, India

**Technology Analyst**

Apr 2022 – May 2026

**Enterprise-Scale CI/CD Migration: Jenkins to GitHub Actions:**

**Role:** DevOps Engineer / SRE

- Led a strategic migration from Jenkins to GitHub Actions, building a scalable CI/CD pipeline that accelerated delivery velocity and reduced release cycles by 30%, while increasing operational resiliency across environments.
- Engineered end-to-end Infrastructure as Code (IaC) using Terraform, standardizing multi-cloud provisioning workflows for AWS, Azure and GCP while ensuring predictable, repeatable deployment footprints.

- Operationalized containerization by integrating Docker into the application delivery lifecycle, increasing deployment throughput by 25%, and optimizing runtime performance across distributed systems.
- Championed talent enablement by mentoring junior engineers, conducting structured code reviews, and facilitating recurring knowledge-sharing sessions to reinforce a culture of continuous improvement.
- Automated cross-stack testing frameworks in Python, TypeScript, and Bash, increasing code quality through automated validation gates embedded in the pipeline and reducing post-release defects by 15%.
- Partnered with security and compliance teams to incorporate DevSecOps best practices into the toolchain, strengthen governance controls, and enhance adherence to industry standards.
- Drove stakeholder-centric release optimization by capturing feedback loops and iterating on deployment workflows, aligning delivery mechanics with evolving business priorities and maximizing team efficiency.

**Infosys Pvt Ltd**

**Senior Systems Engineer**

Bengaluru, India

Oct 2021 – Mar 2022

**Jenkins CI/CD Monitoring and Performance Optimization System:**

**Role:** DevOps Engineer

- Designed and developed a Python-based monitoring engine integrated with Jenkins APIs to analyze CI/CD pipeline performance, enabling proactive bottleneck detection and improving build efficiency by 25%.
- Implemented MongoDB-backed dashboards offering real-time and historical visibility into CI/CD metrics, empowering engineering teams with actionable insights for data-driven decisions.
- Delivered a scalable, low-maintenance monitoring framework that enhanced operational reliability and reduced troubleshooting efforts by 40%.
- Collaborated with DevOps and platform teams to optimize Jenkins job configurations and standardize integrations across multiple projects, ensuring consistent observability practices.
- Automated workflow data collection and analysis using Python and Jenkins pipelines, reducing manual intervention and improving reporting accuracy across environments.
- Championed continuous improvement by incorporating stakeholder feedback and aligning monitoring capabilities with evolving CI/CD strategies, improving delivery transparency, and team efficiency.

**Education**

**N.B.K.R Institute of Science and Technology**

Bachelor of Technology

Nellore, India

2017 – 2021

**Certificates**

Microsoft GH 200 - GitHub Actions

Harness Certified Continuous Delivery and GitOps Developer

Harness Certified Continuous Integration Developer

Infosys Certified DevOps Professional
